Comments: Performance against getting 5 firefighters to all Life Risk Fires continues to be good. Getting 8 firefighters to the incidents has significantly improved over last year's performance and has only just missed target. The benefit from the introduction of XL Cabs onto single pump stations, as well as the increase in the number of Retained firefighters, are both contributing towards this improvement.

Comments: Recognising the length of time it can take for the Rescue Tender (RT) to attend incidents on the outskirts of the county, over the last few months the Service has provided additional RTC equipment on the Ford Rangers, stationed in those areas. Whilst this equipment does not always negate the need for the RT to attend a particular incident, it ensures there is sufficient equipment for the crews already in attendance, to be more effective in tackling multi-vehicle RTC's. Our current Response Standards are not able to reflect the benefit of these changes. With the new Incident Reporting System (IRS) now fully implemented, the Service has the opportunity to review its Response Standards with the aim of overcoming this and other limitations that exist with the current RTC Standards. This work will be progressed, with any proposals for change coming to the Fire Authority at a future date.

Comments: With only two measurable incidents in the whole of the first quarter (no incidents in the low risk areas), the end of year predictions shown in the table should not be given much weight. The failure in the high risk area involved a person threatening to jump into the river who was subsequently talked down by the Police. The attendance time of the first appliance was less than 11 minutes.

Performance against Best Value Performance Indicators April 2009 to June 2009

10 September 2009

National / Local Agreements.

A number of National indicator targets, which will support the establishment of the Local Area Agreements (LAAs) have been identified by officers, which the actions of Fire and Rescue Authorities will impact upon. These include the following:

- NI 33 Arson Incidents.
- NI 37 Awareness of civil protection arrangements in the local area.
- NI 47 People killed or seriously injured in road traffic accidents.
- NI 48 Children killed or seriously injured in road traffic accidents.
- NI 49 Number of primary fires and related fatalities and non-fatal casualties excluding precautionary checks.
- NI 189 Flood and coastal erosion risk management.

The two National indicators which the areas have decided to focus on are highlighted in bold above (NI 33 and NI 49).

Notes:

NI 33 Arson Incidents - The rationale for this indicator; Deliberate fires are a key component of Anti-Social Behaviour which is a national priority for Government. The numbers of deliberate primary and secondary fires are reported within the performance.

NI 49 Number of primary fires and related fatalities and non-fatal casualties (excluding precautionary checks) – The rationale for the indicator is linked to DS04: "To support local government that empowers individuals and communities so citizens feel they have a voice and can influence decisions; and promotes sustainable development and high quality services". The indicator assists in this by measuring the incidence of fires and related casualties, and is therefore a means by which individuals and communities can assess the fire safety support provided by their local fire service as well as supporting performance assessment by the Audit Commission.

Environment.

How much do we impact the environment?

The Service uses an overall assessment of our environmental impact which assesses the impact of all of our activities and allocates a value to them.

			Per	formance			Success Or Failure		Examples of how Shropshire Fire
Environment al Impact	Target setting	Q1 (April- June)	Q2 (July- Septem ber)	Q3 (October- December)	Q4 (January - March	Outturn/ Predicted Outturn	Likely / / Lower is better	Comments	and Rescue Service contribute to a positive impact on the Environment.
Value 2008/09	880	879	849	849	849	849	✓	The impact assessment started reporting in December	Controlling Actions Positive impact on the environment Audit and Registration
Value 2009/10	830	849	832				✓	2007. The performance at the time was 925 with a baseline figure of 1,000 so there has been a considerable reduction in impact (Improvement in performance).	Introduction of Fluorine-free foam: Fluorine is a pollutant that builds up in water courses. A move to Fluorine-free foam reduces the direct impact of our operational and training activities and the indirect impact of our procurement

Key Financial Health Indicators 2009/10

*Following recommendation by the Audit Commission, a suite of health indicators have been devised which demonstrate how the processes and procedures carried out by the Finance department contribute to the strategic aims of the Authority. The indicators show how key financial systems are monitored and reconciled, and this in turn places reliance on the monitoring information and statutory documents produced by the department.

Indicator	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar
Key financial ledgers reconciled by end of following period:												
Sales ledger Purchase ledger Cash & Bank	8 May 8 May 24 Jun	2 Jun 2 Jun 24 Jun	29 Jun 10 Jul 1 Jul									
Budget monitoring reports produced, reconciled to ledger and issued to budget holders, within 10 working days of period end	N/a	11 Jun	7 Jul		Č							
Salaries monitoring reports produced, reconciled to ledger and issued to budget holders, within 14 working days of period end	N/a	N/a	20 Jul	30	7							
Revenue budget performance reported to Policy Group, by end of following period	N/a	N/a	29 Jul									
Capital spend reported to Policy Group, by end of following period	N/a	N/a	29 Jul									

Indicator	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar
BVPI 8 - percentage of invoices paid within 30 days Target for year 98.5%	94.7%	95%	94%	98%								
Percentage of payments made by BACS	97%	96.5%	96%						_			
Budget book to be produced by June 2008	8 Apr											
Statement of Accounts to be approved by the Fire Authority by 30 June				CFA 3 Jul*								
Statement presented to auditors with full working papers – signed off by 30 Sept												

^{*}Dispensation given from Audit Commission due to Unitary elections
