Shropshire and Wrekin Fire Authority Audit and Performance Management Committee 13 March 2008

# Performance against Best Value Performance Indicators April 2007 to December 2007

## **Report of the Chief Fire Officer**

For further information about this report please contact Alan Taylor, Chief Fire Officer, on 01743 260200 or Kate Langford, Statistical Research Officer, on 01743 260277.

## 1 Purpose of Report

To inform Members of the Brigade's performance against nationally prescribed Best Value Performance Indicators (BVPIs) for the period 1 April 2007 to 31 December 2007.

## 2 Recommendations

The Committee is asked to:

- a) Note the report content in respect of performance; and
- b) Consider the information provided, giving comments, where appropriate, for amendments to future reports to aid the regular assessment of performance.

## 3 Background

Communities and Local Government (CLG) publish BVPIs for fire and rescue authorities. Performance against nationally prescribed BVPIs enables the Government to produce annual league tables, which in turn enables performance to be assessed against peer authorities and identifies areas of good or weak performance. Such information is invaluable in supporting the identification of priorities for forthcoming performance improvement strategies.

Following the publication of the Fire Service National Framework Document 2007/8, amendments have been made in relation to the reporting of some of the Best Value Performance Indicators.

1

## 4 Report Content

This report documents performance for Quarter 1, Quarter 2 and Quarter 3 of the 2007/08 reporting year against the BVPIs outlined in Annexe F of the Framework Document and, as a consequence, targets and performance published in Fire Authority's Performance Plans 2005/06, 2006/08 and 2007/08.

For each performance indicator a graph has been produced, detailing the following information:

- Current performance for the 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> quarters of 2007/08;
- Trend line for 2007/8;
- Previous data from 2005/06, 2006/07, where applicable; and
- Target threshold, where appropriate.

Each graph is accompanied by two tables, which contain monthly statistics for 2007/08 and the previous years 2006/07 and 2005/06, where available. The first table contains figures, based on a calculation (the performance indicator or PI), and the second table gives the actual figure. So, in the case of BVPI 142(ii) – the number of primary fires per 10,000 population – the first table gives a figure benchmarked against the population, whilst the second table gives the actual monthly figures (i.e. the actual number of primary fires). A year to date (titled YTD in the tables) total is also given, so that the running total of the current year can be monitored against the previous full-year figure, except for BVPIs 2a, 2b, 11, 17, 157 and 210, where the last month reported is the cumulative full year total to date.

A final table at the foot of each page contains an analysis table, which includes the following:

- Yearly Target
- Will the Authority achieve its yearly target?
- Will the current yearly results improve on the previous year's outturn?

A national comparison table is shown for the majority of BVPIs. This is taken from the Department for Communities and Local Government (DCLG) National Performance League Tables, and has been amended to shown positional achievement, and additional columns added to show the performance submission for 2006/07 and also an estimate of the 2007/08 outturn, based on the 1<sup>st</sup>, 2<sup>nd</sup> and 3rd quarter statistics. This outturn figure is different to that included in Appendix A, which is based on the most up-to-date figures available immediately before this report is sent to print. These tables have been populated with regional data taken from each of the authorities 2007 published Performance Plans. This Authority has had updated statistics attributed where appropriate.

For clarity, current calculations are based on the following data, which has been updated for the full reporting year in line with the guidance set out by the DCLG:

	Figure	Source
Population of Shropshire	453,300	Registrar General Mid Year
	453,300	estimates 2006
Domestic Dwellings in	189,613	Chartered Institute of Public Finance
Shropshire	109,013	and Accountancy (CIPFA) 2007
Non-Domestic Dwellings	153,54	Chartered Institute of Public Finance
in Shropshire		and Accountancy (CIPFA) 2007

Appendix C gives information on injuries, which have been sustained whilst on duty, and if they have any impact on sickness absence. Therefore, a brief summary of the number of accidents, RIDDOR reportable numbers and days lost is given by month.

Appendix D is included to allow for further analysis of indicators on request, or to enable local indicators to be included, again currently by request.

#### **Supplementary Notes**

- An estimated figure has been included for BVPI150 Expenditure per head of population, as this is calculated on an annual basis, and verified in arrears.
- Trend Lines on graphs are not based on seasonal variations.

### 5 Performance

Performance is summarised and recorded within the following appendices:

### Appendix A

This gives the estimated 2007/08 Estimated Outturn, based on the latest available statistics (not actual and unverified);

### Appendix B

This includes specific information on each individual Service Delivery and Corporate Health Indicator, including support graphs and tables, along with national comparison tables where applicable. These tables have been populated with regional data taken from each of the authorities' 2007 published Performance Plans. This Authority has had updated statistics applied where appropriate;

### Appendix C

Shows accidents on duty and those leading to sickness absence; and

3

### Appendix D

Is a Local Indicator Report, giving further background detail. This appendix will be used to give further analysis details, where requested by either Members or Policy Group.

## 6 Financial Implications

There are no financial implications arising directly form this report.

## 7 Legal Comment

Fire and rescue authorities are required to report BVPIs to the Government on a quarterly and annual basis. BVPIs to be reported are promulgated at Annex D of the Fire and Rescue Service National Framework Document 2006/08. As a consequence these BVPIs and associated targets appear in the Authority's Performance Plan 2006/08.

## 8 Equality Impact Assessment

Officers have considered the Service's Brigade Order on Equality Impact Assessments (Personnel 5 Part 2) and have decided that there are no discriminatory practices or differential impacts upon specific groups arising from this report. This is a factual report based on historical statistical data, with no recommendations for change and has no direct impact on people. An Initial Equality Impact Assessment has not, therefore, been completed.

## 9 Appendices

### Appendix A

2007/08 Estimated Outturn (not actual and unverified)

### Appendix B

Performance Information on Current BVPIs for 2006/07

### Appendix C

Accidents on duty and those leading to sickness absence

### Appendix D

Local Indicator Report

## 10 Background Papers

### Office of the Deputy Prime Minister:

- Fire Service Circular 60-2004 (December 2004) Guidance for Best Value Performance Indicators (BVPIs) 2005/06
- Fire Service Circular 14-2005 (March 2005) Revised Guidance for Best Value Performance Indicators (BVPIs) 2005/06
- Fire and Rescue Service National Framework Document 2006/08
- Fire and Rescue Service National Framework Document 2007/08

Implications of all of the following have been considered and, where they are significant (i.e. marked with an asterisk), the implications are detailed within the report itself.

Appendix B to report on Performance against Best Value Performance Indicators April 2007 to December 2007 Shropshire and Wrekin Fire Authority Audit and Performance Management Committee 13 March 2008

## **Service Delivery Indicators**

Amendments have been made to the figures reported under BVPI 149. The guidance and implementation of the reporting of this statistic now allows for the removal of all properties from 2005/06 onwards. This is to be considered especially in relation to yearly comparisons as previous years statistics contain domestic properties.

Please be aware that currently for Quarter 1, Quarter 2 and Quarter 3 2007-08 there are no outstanding FDR1s (incident reports, since April 2006) that may affect the following data once complete.

#### BV 142(ii) - Number of primary fires<sup>(1)</sup> per 10,000 population<sup>(2)</sup>

() As returned on form FDR1.

Includes caravans, houseboats and other non-building structures used as permanent dwellings.

() Source: ONS 2005 mid-year estimates.

(\*) Some fire and rescue services have been reviewing the way in which non-fatal casualties are recorded. This could account for some of the

changes in the injury rates in 2002/03.

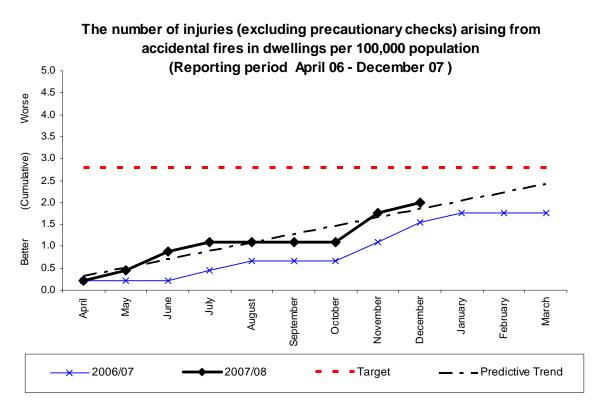

(\*) In 2004/05 County Ducham and Darlington improved their recording procedures for injuries. Consequently, a larger proportion have been recorded

as 'precautionary checks' (and therefore been excluded from BVPI calculations) than in previous years. This accounts for some of the reduction in 2004/05.

(\*) In 2004/05 Humberside improved their recording procedures for injuries. Consequently, a larger proportion have been recorded

as 'pressutionary checks' (and therefore been excluded from BVPI calculations) than in previous years. This accounts for some of the reduction in 2004/05.

© Souze: Communities and Local Government Local Government Finance RO6 return.

(\*) The data for 2003/04 to 2005/06 have been collected on an FRS17 basis. The main difference between these and previous years is that decisions

relating to pensions are accounted for in the year they are taken, rather than in the year to which they apply. As a result, comparisons between 2003/04, 2004/05 and 2005/06 and earlier years may not be valid.

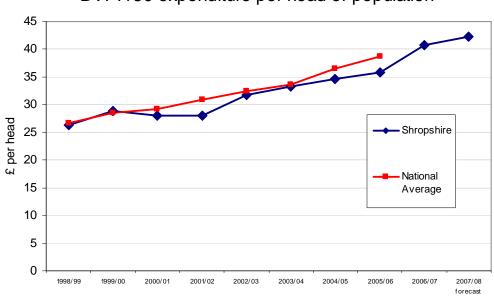

<sup>(9)</sup> Data have been revised following the publication of revised mid-year population estimates by ONS in October 2004.

 $^{(9)}$  2003/04 was previously published as 53.2. It has been revised in the light of an amendment received from the Brigade. N/Av Not available.

Putting Shropshire's Safety First

This BVPI is produced yearly and is taken from the CIPFA statistics. 2005/06 data has now been verified by the DCLG. 2006/07 and 2007/08 are estimates based on the budget.

BVPI 150 concerns the expenditure per head of population on the provision of fire and rescue services. For information purposes, a graph of historic verified data is shown, with comparison made with the national average.

23

These tables cover the attendance at fires and RTCs classed as 'Life Risk', and is a monthly cumulative count on performance for the 2006/07 reporting year, which is the first reportable year. As such, the targets have been set against no historic data. Monitoring will continue monthly and reported view this report on a quarterly basis.

It should be noted that the areas already planned for improvement, including XL cabs and additional rescue equipment, will help to improve the Brigade's performance in the areas where standards are not currently being met.

(!) The change in the definition of the levels reached means that data for 2002/03 onwards are not

directly comparable with data for previous years.

 $^{\oslash}$  2001/02 has been previously published as Level 2. It was revised in the light of amendments

received from the fire and rescue service.

<1 This authority is working towards achieving Level 1.

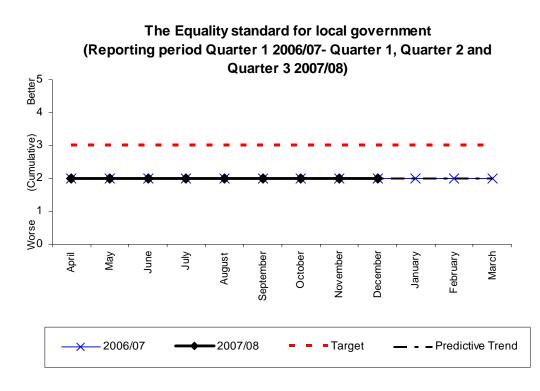

x This authority has not adopted the Equality Standard for Local Government.

Yearly target	Will Authority achieve target? (Estimate using predictive trend)	Have current yearly results (including predictive trend) improved since last year?
3	Х	=

#### Commentary:

Level 2 has been achieved and progress towards Level 3 is ongoing. Capacity building funding bid has been awarded to the region for all services to achieve Level 3. The Brigade will be going for external verification for Level 3 of the standard in August 2008.

Analysis

Yearly target	Will Authority achieve target? (Estimate using predictive trend)	Have current yearly results (including predictive trend) improved since last year?
0.43%	Х	Х

#### Commentary:

Although the percentage target is a fail, the actual number of fire fighters retiring through ill health is 1 which is the equivalent to the actual number in the yearly target. The total establishment has changed.

#### <u>Table 10</u>

### Commentary:

The cultural audit shows that about 7% of staff overall classed themselves as disabled. This has not been declared for the BVPI's due to staff anonymity. Also a data gathering/cleansing exercise is planned for completion by April 2008.

Analysis

Yearly target	Will Authority achieve target? (Estimate using predictive trend)	Have current yearly results (including predictive trend) improved since last year?
3.4%	Х	Х

### Commentary:

Whilst the number of women fire fighters increased in October to 11, the figure reduced back to 10 in December due to a women fire fighter leaving the Brigade.
